

**pale circus**

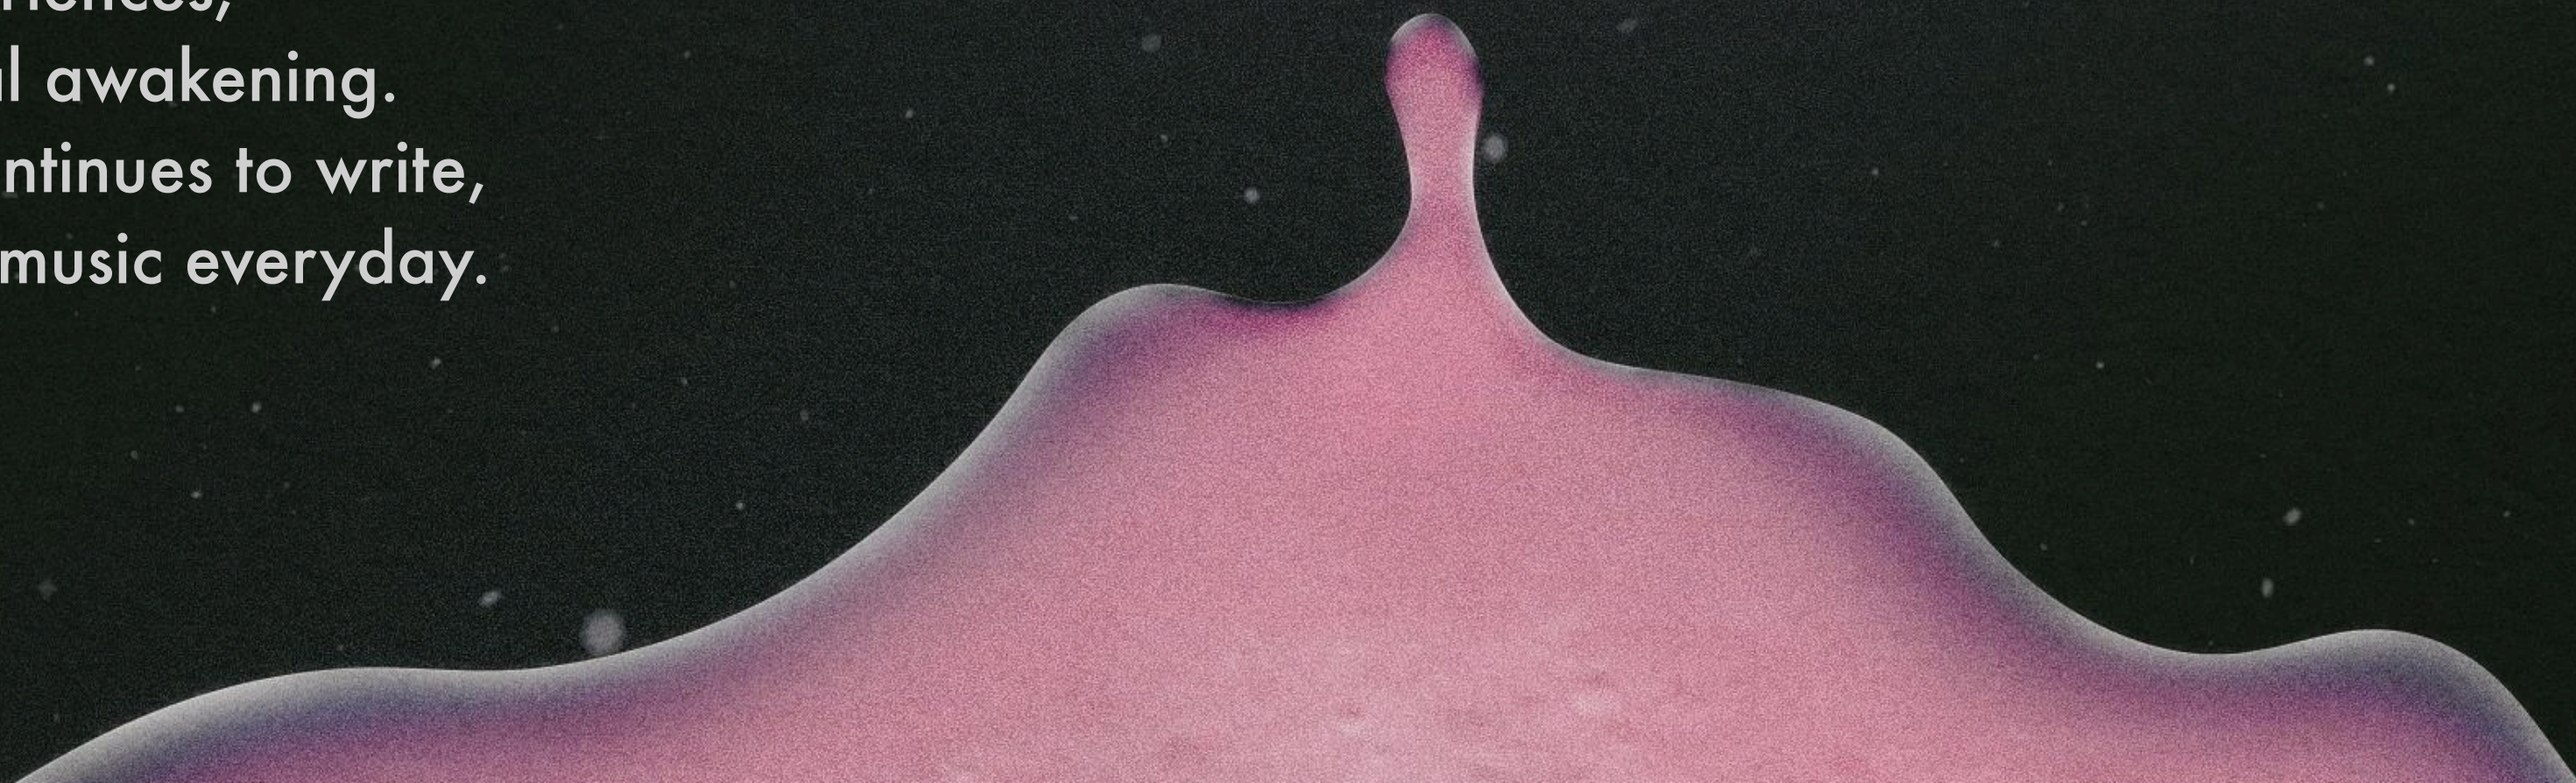

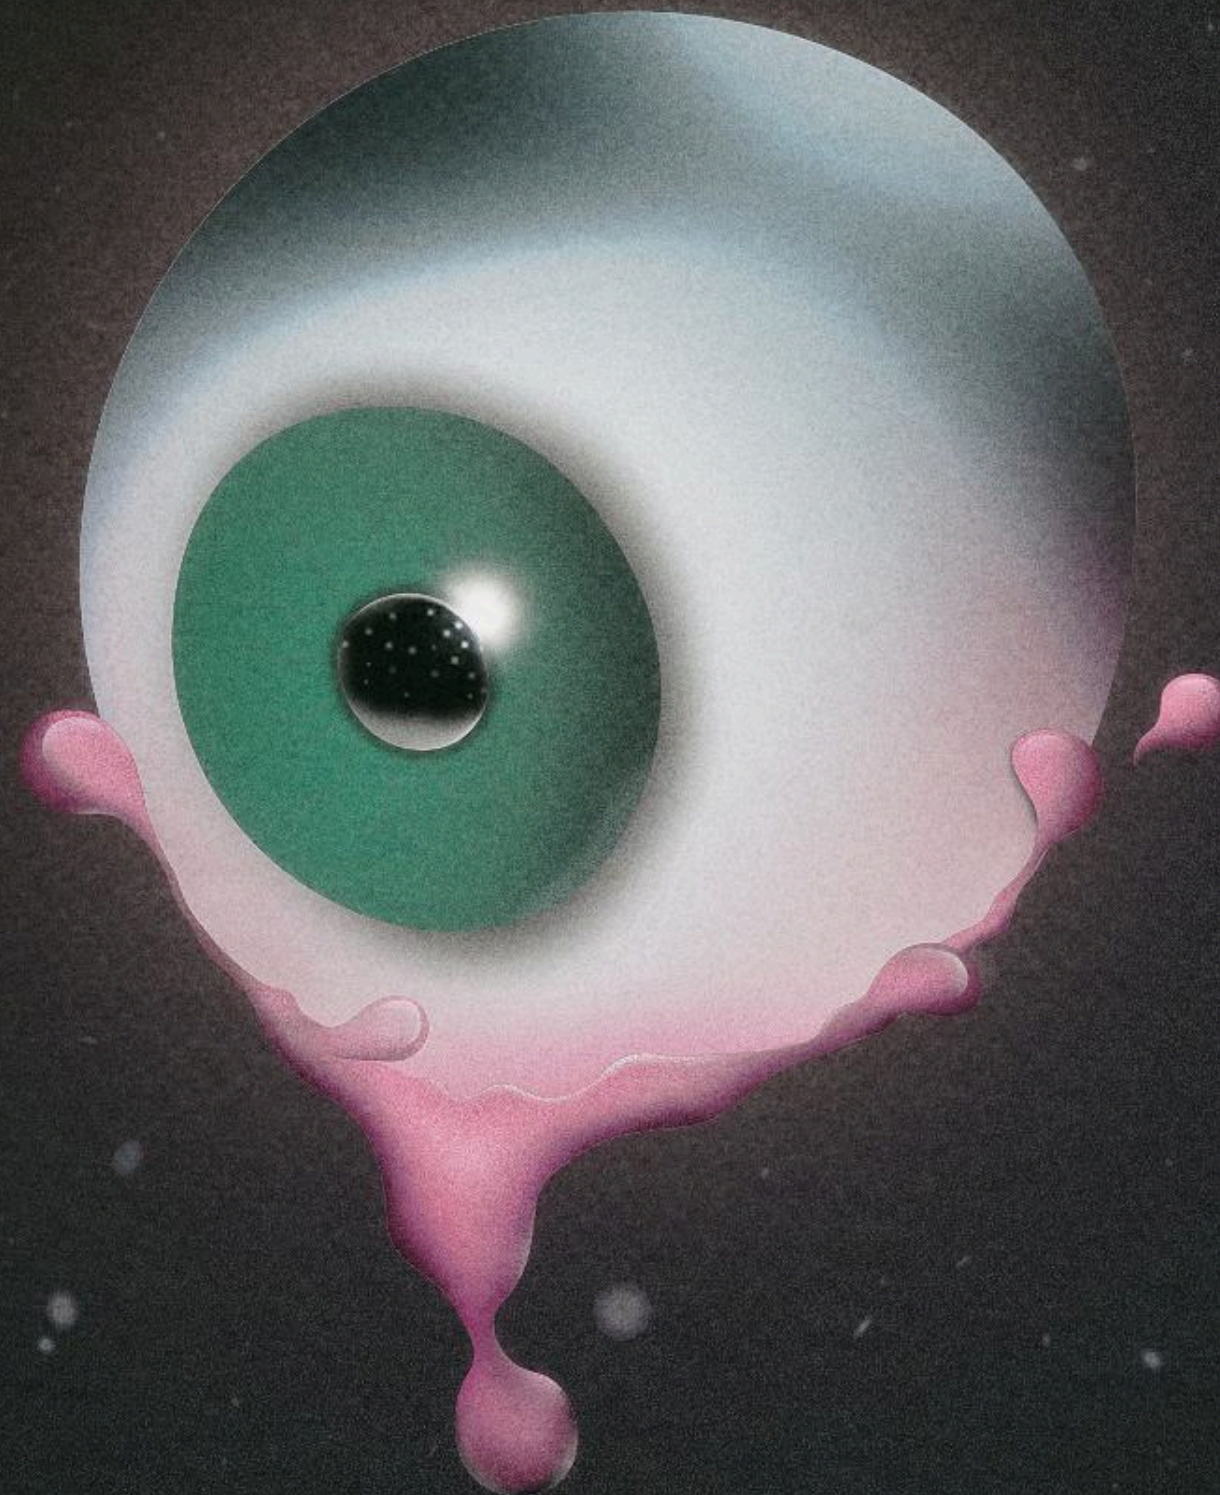

Pale Circus, named after its lyrical concept and emotional atmosphere, is a music band in constant pursuit of unique and original sounds. Initially formed as Ege's solo project in 2020, Pale Circus evolved into a four-piece band in 2023 following the release of their debut album *Collecting Memories*. The band now consists of Cem Ölmez, Dersu Doğan, Doğuhan Okyar, and Ege Baydar, and they actively write new music and perform live. Drawing inspiration from neo-psychedelia, shoegaze, psychedelic rock, dream pop, indie pop, indie rock, and industrial rock, Pale Circus continue to produce new songs and singles with a more refined musical approach and perspective, while currently working on their next album.
